

HOSTEL MANAGEMENT SYSTEM

Hebatallah AbuHarb || Shahd thalathini

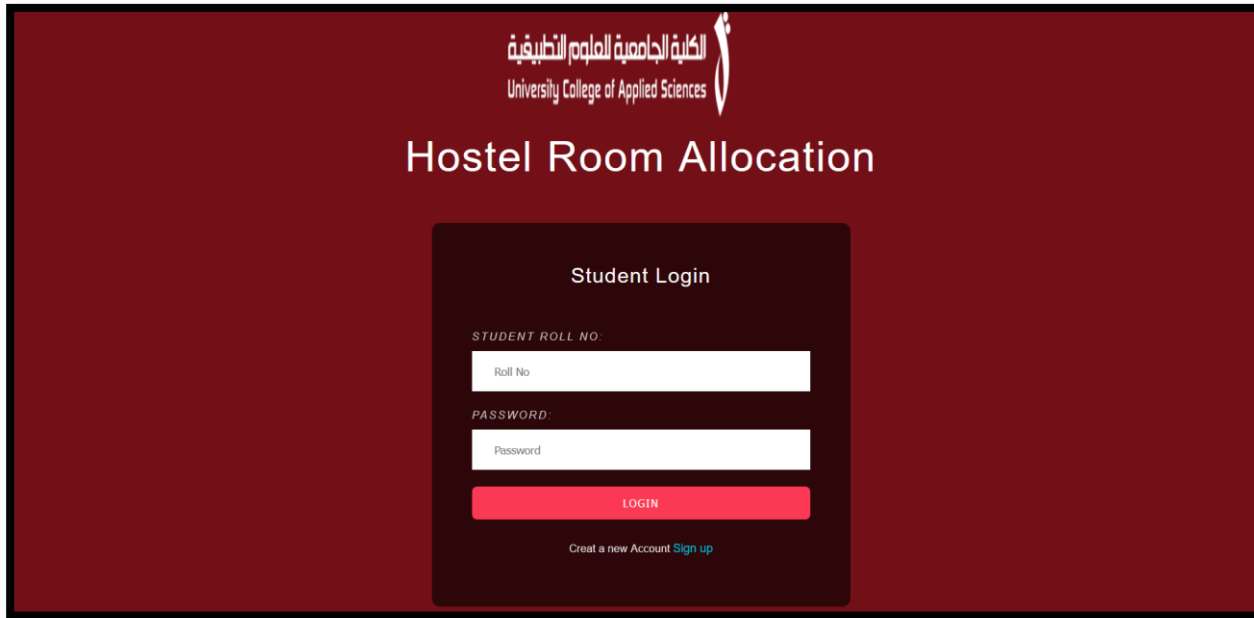

HOSTEL MANAGEMENT SYSTEM

Hostel management system is a database application that aims to computerize the current procedures of allocating hostel rooms and simplify the process of communication between students and hostel managers.

RECOMMENDATIONS

Right now, the website is only developed for student purposes. In the future, it can be expanded where Admin and Hostel Manager can also have a feature to login and allow students to their respective rooms.

THANKS
